Exploratory Data Analysis Late Nights at MOMA PS1

Aathira Chennat

The Client

MOMA PS1

When should the museum schedule “Late Nights at MOMA PS1,” an initiative to boost weekday visitor metrics through extending hours and discounting admission?

Model

Evaluate weekly and daily traffic patterns at stations with direct service to Court Square, within three stops of Court Square.

Lines of Interest

The E

Financial District to Jamaica Plain, Queens

The M

Queens to Manhattan to Brooklyn

The 7

Times Square to Flushing, Queens

The G

Brooklyn to Queens

The Data & Tools

- MTA Turnstile Data at the Station Level
  - 2021 Calendar Year
  - 120,235 Observations.
- Pandas, SQLalchemy for data manipulation
- Matplotlib and Seaborn for plotting

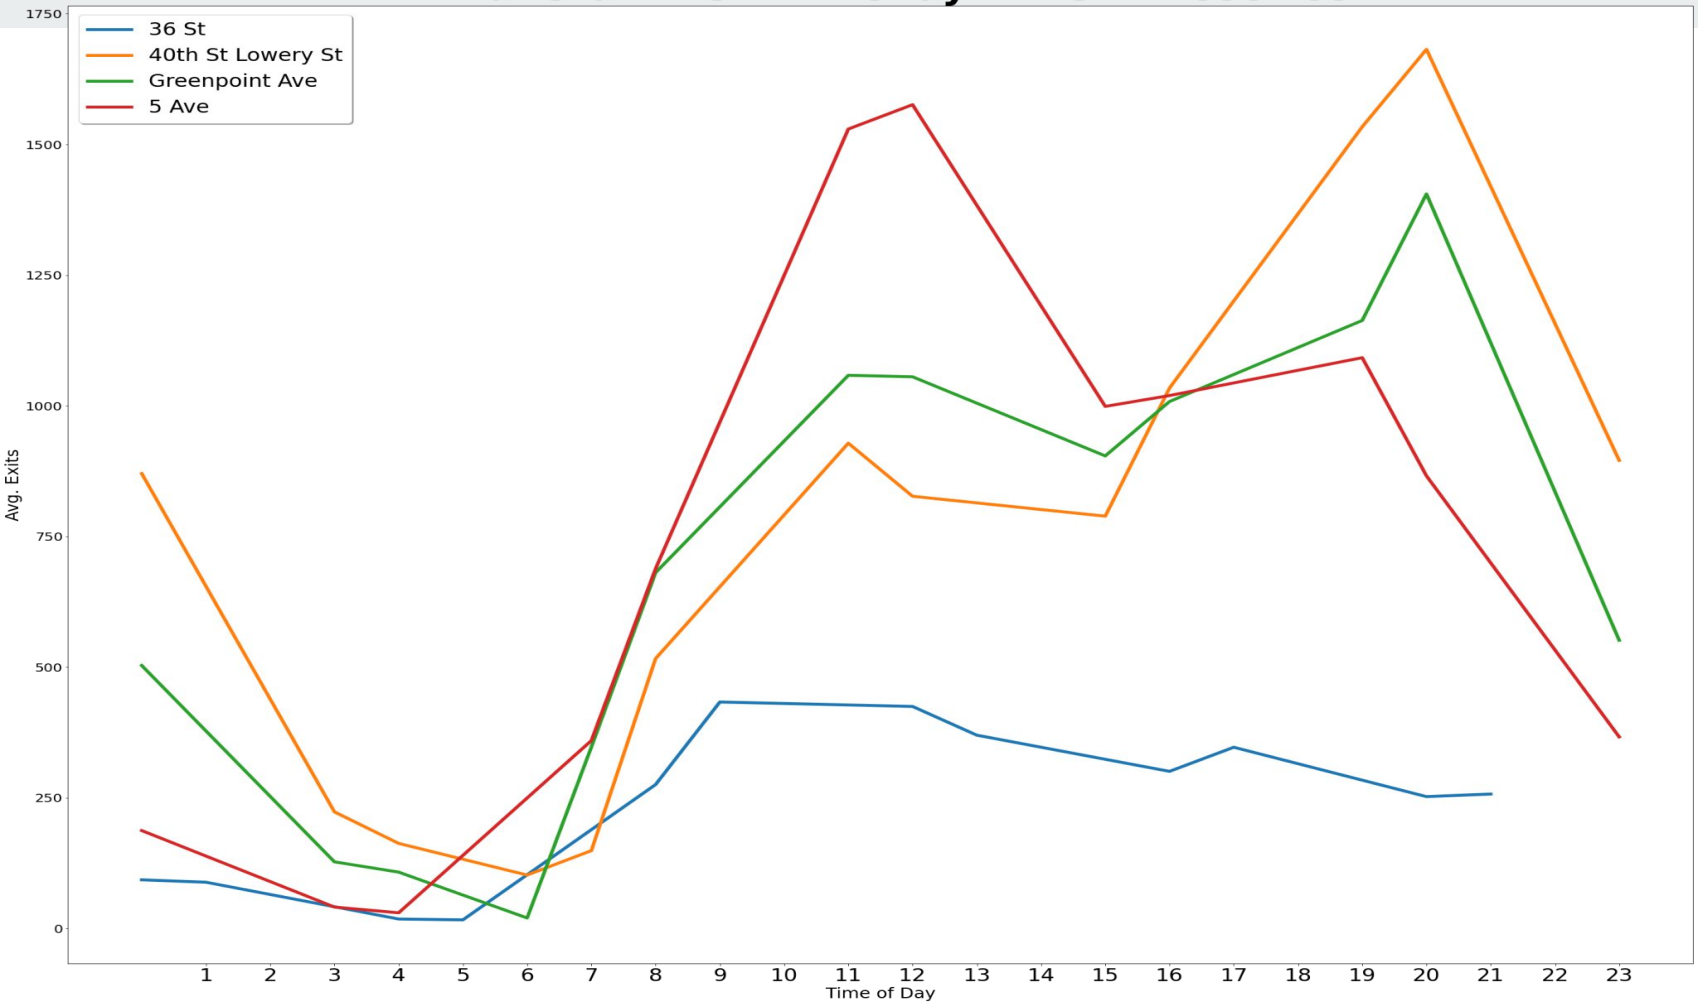
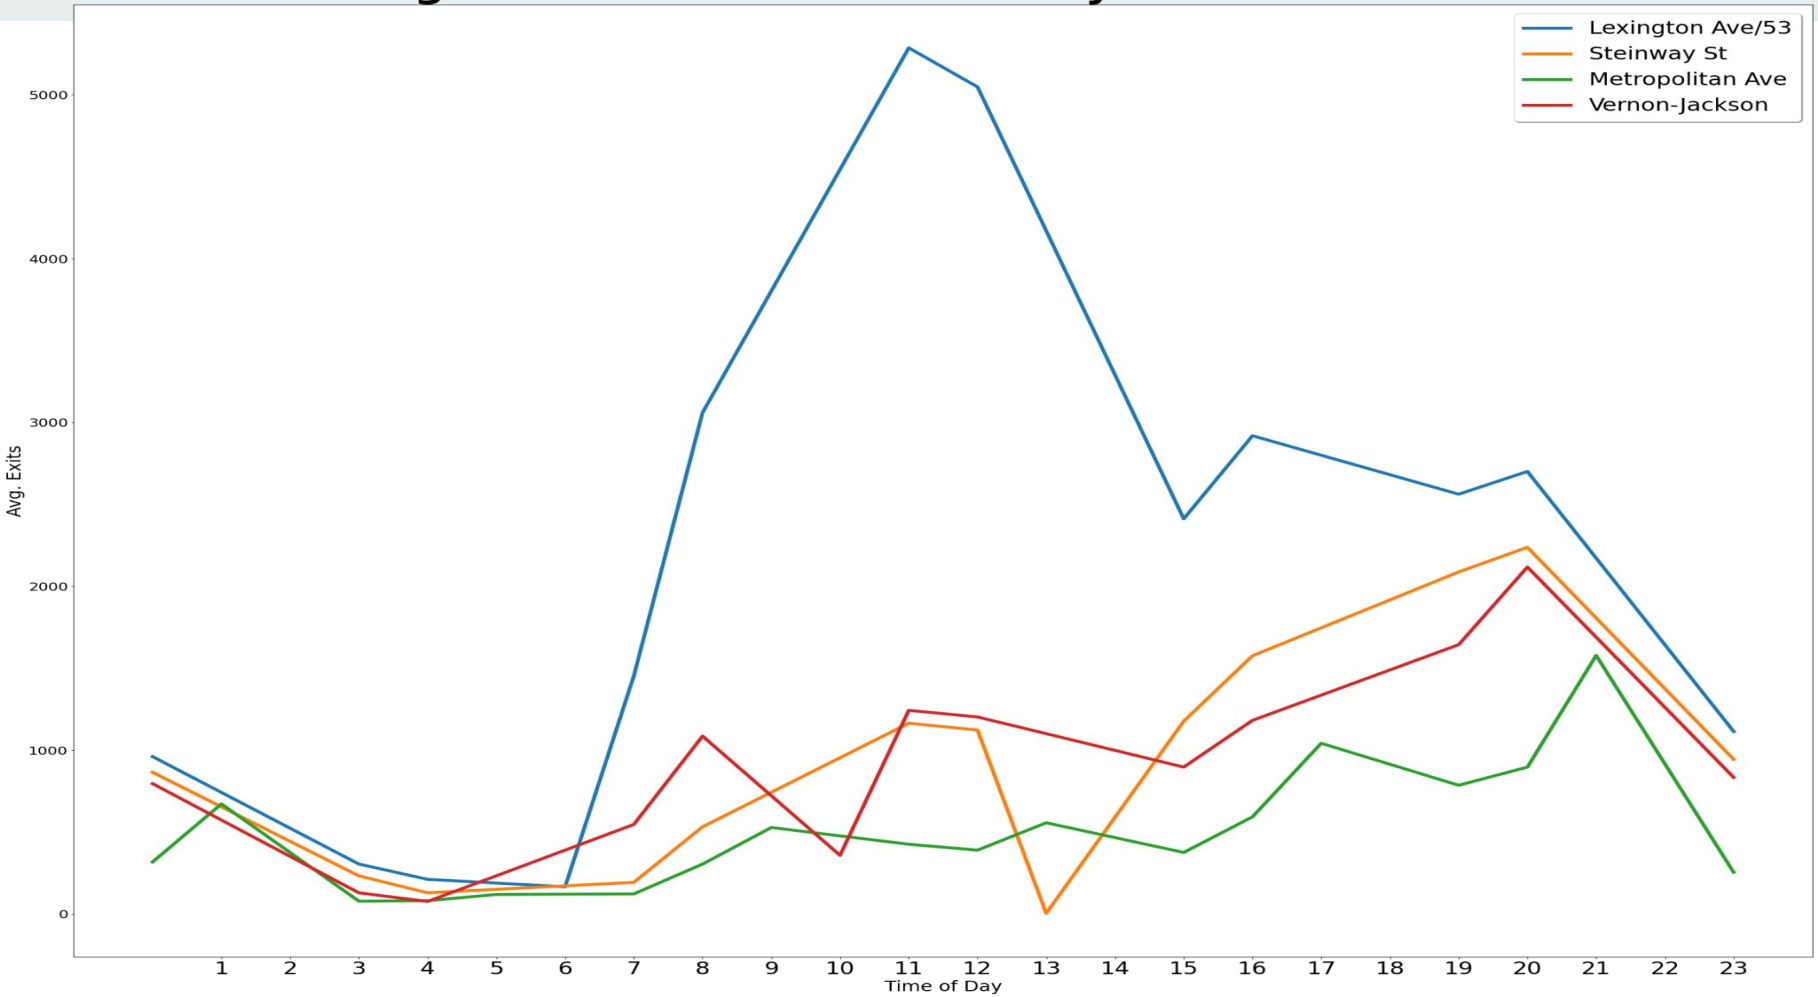
Determining Extended Hours

Local Stations: Thursday Exits Timeseries



High Traffic Stations: Thursday Exits Timeseries



Conclusions

- Thursday is a great day for Late Nights at MOMA PS1
- Exit Traffic peaks around 8 pm for local stations and 9 pm at high-traffic stations
- Late Nights at MOMA PS1 should launch on Thursdays, offering discounted admission until 9.
    - The museum may also consider extending hours on Friday and shortening hours on Saturday and Sunday

Future Work

- Hone in on “real” commuter exits.
  - Pay attention to stations where average exits exceeds entries in the evening.
- Look at weekend traffic patterns
  - Recalibrate weekend hours
